SUMMARY

Results-driven Backend Developer with 3+ years of experience building enterprise-grade applications using Java, Spring Boot, and Oracle PL/SQL. Proven track record at Oracle and NexGen Technologies in designing RESTful APIs, optimizing high-volume SQL queries, and implementing secure, scalable systems with role-based access control. Passionate about clean architecture and AI-powered tooling.

EDUCATION

Vellore Institute of Technology <i>Bachelor of Technology in Computer Science and Engineering</i>	Chennai, IN June 2019 – May 2023
Amity International School <i>12th Grade</i>	Noida, IN March 2018 - March 2019
Amity International School <i>10th Grade</i>	Noida, IN March 2016 - March 2017

EXPERIENCE

NexGen Technologies <i>Backend Developer</i>	Oct 2025 – June 2026 Noida, Uttar Pradesh
- Project: Employee and Access Management System. - Built RESTful APIs using Spring Boot with layered architecture (Controller, Service, Repository) for multiple internal teams. - Implemented DTO-based request/response handling to decouple API contracts from database entities for better maintainability. - Integrated Spring Data JPA for database operations using repositories and entity mappings to reduce raw SQL boilerplate. - Implemented role-based access control (RBAC) via Spring Security to restrict API endpoints by user roles for enhanced security. - Wrote unit and integration tests using JUnit and Mockito to improve reliability and reduce regression bugs across critical modules. - Managed environment-specific configurations using Spring Profiles across development, staging, and production. - Designed and documented RESTful API contracts using Swagger/OpenAPI to streamline collaboration across frontend and QA teams. - Implemented global exception handling via <code>@ControllerAdvice</code> to standardize error responses across all API endpoints. - Optimized database queries using JPQL and native queries to reduce average API response time for high-traffic endpoints. - Participated in code reviews and applied clean code principles to maintain a high-quality and readable codebase.	
Oracle <i>PL/SQL Developer</i>	Sept 2023 – June 2025 Noida, Uttar Pradesh
- Developed backend reporting solutions using SQL and Oracle BI Publisher, reducing report generation time by streamlining data pipelines. - Built and maintained enterprise web applications using Oracle APEX with complex data workflows serving cross-functional business teams. - Automated backend processes and reporting pipelines using scheduled PL/SQL jobs, improving system efficiency and turnaround time. - Wrote PL/SQL stored procedures, functions, and packages to encapsulate and modularize critical business logic. - Designed database triggers to enforce data integrity and automate audit logging across critical business tables. - Performed SQL query tuning using execution plans, indexing strategies, and hints to optimize high-volume transactional queries. - Collaborated with functional teams to translate business workflows into database-driven solutions using Oracle 19c. - Managed and optimized large-scale relational database schemas, ensuring normalization and referential integrity across modules.	

- Developed dynamic SQL scripts for data migration and bulk data processing tasks across multiple environments.
- Participated in UAT (User Acceptance Testing) cycles, resolving data discrepancies and fine-tuning queries based on business feedback.
- Maintained version-controlled PL/SQL scripts and deployment runbooks, ensuring smooth releases across dev, QA, and production.

PROJECTS

ApplyKing AI | *Spring Boot, Spring Data JPA, REST API*

Oct 2025

- Built RESTful APIs using Spring Boot with layered architecture (Controller, Service, Repository) for multiple internal teams.
- Developed an intelligent resume parsing engine that extracts skills from uploaded PDF resumes and performs AI-based job matching using dynamic scoring algorithms.
- Integrated real-time job scraping from Indeed using Playwright browser automation, enabling live job recommendations instead of static/mock job data.
- <https://github.com/palash4263/AI-Job-Platform>

3D Portfolio | *React, Vite, Tailwind CSS, and React Three Fiber*

Sept 2023

- Developed an interactive 3D portfolio website using React.js, Vite, and Tailwind CSS for showcasing projects.
- Integrated React Three Fiber and Three.js to create immersive 3D experiences and animated models.
- Built responsive and modern UI components with smooth animations and optimized layouts for different screen sizes.
- <https://github.com/palash4263/3d-Portfolio>

TECHNICAL SKILLS

Languages: Java, Python, C/C++, SQL (Postgres), JavaScript, HTML/CSS

Frameworks: Spring Boot, Spring MVC, Spring Data JPA

Developer Tools: Git, Google Cloud Platform, VS Code, Visual Studio, PyCharm, IntelliJ, Eclipse

Libraries: pandas, NumPy, Matplotlib
