

Palash Mishra

Software Developer Noida, IN

palashmishra47@gmail.com | +917428477219 | linkedin.com/in/palash-mishra-6a68a71aa

AI-First Full Stack Developer with 2+ years of experience building scalable REST APIs and intelligent web applications using Java, Spring Boot, Python, and React.js.

EXPERIENCE

Oracle

Sept. 2023 – Jun 2024

Software Developer Noida, IN

- Developed and deployed scalable REST APIs using Java and Spring Boot for enterprise SaaS applications serving thousands of concurrent users.
- Leveraged GitHub Copilot and ChatGPT to accelerate backend development cycles, automating boilerplate generation and unit test scaffolding, reducing implementation time by 20%.
- Designed normalized relational database schemas and implemented core business logic on PostgreSQL, ensuring data integrity and optimized query performance.
- Built secure APIs with JWT-based authentication, OAuth 2.0 support, input validation, and structured error handling aligned with industry security standards.
- Collaborated with cross-functional teams to define API contracts, deliver backend features, and write technical documentation for onboarding.

Nexgen Tech Solutions

Oct. 2024 – Apr. 2025

Backend Engineer Noida, IN

- Built full stack backend services using Java, Spring Boot, and RESTful APIs integrated with React.js frontends.
- Integrated OpenAI API into existing systems to enable AI-powered features, reducing manual processing time by 30%.
- Used GitHub Copilot and ChatGPT to automate code generation, documentation, and testing, improving team velocity by 25%.
- Implemented JWT authentication, RBAC, structured exception handling, and API security validation across all backend services.
- Optimized database queries and service logic in PostgreSQL, improving API response times and overall application performance.

PROJECTS

Secure Document Management

- Built secure REST APIs using Spring Boot with OpenAI API integration for AI-driven document classification and summarization.
- Implemented JWT authentication, RBAC, end-to-end encryption, and scalable PostgreSQL schema for metadata and audit logs.
- Automated document validation and error handling pipelines, reducing manual review effort by 40%. API Rate Limiting Security Gateway
- Developed API gateway with intelligent rate limiting, request throttling, token-based authentication, and API key validation.
- Integrated LangChain-based anomaly detection to flag suspicious traffic in real time with structured logging for security auditing.
- Designed configurable rate limit policies per user, IP, and endpoint using in-memory caching for low-latency enforcement. Multi-Tenant SaaS User Platform
- Built multi-tenant backend using Spring Boot with isolated PostgreSQL schemas, dynamic role assignment, and OAuth 2.0 session handling.
- Deployed on AWS EC2 with RDS and S3; developed REST APIs for user, role, and permission management using GitHub Copilot.
- Implemented tenant-aware access control and cross-tenant data isolation to ensure enterprise-grade security and compliance.

EDUCATION

Vellore Institute of Technology

Apr. 2019 – May 2023

Bachelor of Computer Science Chennai, IN

SKILLS

Languages & Frameworks: Java, Python, JavaScript, React.js, Next.js, HTML/CSS, SQL

Backend & AI: Spring Boot, Node.js, REST APIs, OpenAI API, LangChain, GitHub Copilot, ChatGPT

Databases & Cloud: PostgreSQL, MySQL, MongoDB, AWS (EC2, RDS, S3), Docker, Git

Security: JWT, OAuth 2.0, RBAC, API Validation, Rate Limiting
