March 2018

Vellore Institute of Technology

Bachelor of Technology, Computer Science

Chennai, IN

June 2019 – May 2023

EXPERIENCE

NexGen Technologies

Backend Developer

Oct 2025 – Present

Noida, Uttar Pradesh

- Project: Employee and Access Management System
- Built RESTful APIs using Spring Boot, following layered architecture (Controller, Service, Repository) to ensure clean separation of concerns and maintainable code.
- Implemented DTO-based request and response handling to decouple API contracts from database entities, improving security and flexibility.
- Integrated Spring Data JPA for database operations, leveraging repositories, entity mappings, and transactional management.

Oracle

SaaS Developer

Sept 2023 – June 2025

Noida, Uttar Pradesh

- Developed and optimized data-driven backend reporting solutions using SQL and Oracle BI Publisher, reducing report generation time significantly.
- Built and maintained enterprise web applications using Oracle APEX with complex data workflows and backend integrations.
- Automated backend processes and reporting pipelines, improving system efficiency and operational turnaround.

PROJECTS

ApplyKing AI | Spring Boot, Spring Data JPA, REST API

Oct 2025

- Built a full stack AI-powered job aggregation platform using React.js, Spring Boot, PostgreSQL, Node.js, and Playwright to automate job discovery and application workflows.
- Developed an intelligent resume parsing engine that extracts skills from uploaded PDF resumes and performs AI-based job matching using dynamic scoring algorithms.
- Integrated real-time job scraping from Indeed using Playwright browser automation, enabling live job recommendations instead of static/mock job data.
- Designed a scalable microservice architecture where Spring Boot handled AI matching/business logic and a separate Node.js scraper service managed browser automation and job extraction.
- Implemented dynamic frontend dashboards with React featuring resume uploads, extracted skill visualization, AI-ranked job cards, live match scores, and direct apply functionality.

Enterprise Reporting Pipeline | Oracle APEX, SQL, Oracle BI Publisher

Sept 2023

- Built automated reporting pipelines using Oracle BI Publisher and SQL, significantly reducing manual reporting overhead.
- Developed enterprise web application modules in Oracle APEX, integrating complex data workflows with backend systems.

TECHNICAL SKILLS

Languages: Java, Python, C/C++, SQL (Postgres), JavaScript, HTML/CSS

Frameworks: Spring Boot, Spring MVC, Spring Data JPA

Developer Tools: Git, Google Cloud Platform, VS Code, Visual Studio, PyCharm, IntelliJ, Eclipse

Libraries: pandas, NumPy, Matplotlib
